

# Concrete Roller Compacted Pipe

As market leaders for more than 80 years, Humes Pipeline Systems offers a wide range of innovative and highly durable steel reinforced concrete pipes. Humes RCP pipe has a D ring jointing system that provides secure and positive jointing. With superior joint tolerances, easy installation and water tightness is assured.

# Concrete Sumps & Accessories

Stormwater drainage is an essential task, with the need to convey water from the sides of roads into drains or underground pipelines. Humes make and supply a variety of products used in the overall stormwater collection process. Just as the requirements for design change from region to region, Humes produces the right product for every specific area in New Zealand.

# Oil Interceptors

The Humes API Oil Interceptor is a device that separates hydrocarbons from stormwater runoff and has the capability to capture an accidental spill of 2500 litres discharging at 1000 litres per minute. The unit is installed underground and has a compact footprint. The shut-off valve allows containment of excessive accidental spills.

# Concrete Power Poles

Humes Civil offers a range of prestressed concrete power poles. These match the characteristics of hardwood poles: lightweight, equal strength in all directions, similar stiffness, a life in excess of 50 years, and robust enough to be handled over rough terrain without damage. The ideal structural solution to these required characteristics is a tapered hollow tube shape. This provides maximum strength with minimum weight and when made out of high strength prestressed concrete results in a pole that is tough, resilient, durable and economical.
