

Concrete Roller Compacted Pipe

As market leaders for more than 80 years, Humes Pipeline Systems offers a wide range of innovative and highly durable steel reinforced concrete pipes. Humes RCP pipe has a D ring jointing system that provides secure and positive jointing. With superior joint tolerances, easy installation and water tightness is assured.

 All prices are exclusive of GST.
 Sizes are not guaranteed and may vary from stated lengths due to manufacturing processes. Contact your Sales Centre for details.
 Weights are not guaranteed and may vary on a regional basis from stated weight. Contact your Sales Centre for details.

Concrete VT Pipe Medium

Humes VT Titan Pipe is made to the AS/NZS 4058:2007 standard but also complies with many recognised international standards. VT pipes are made through a vertical casting process. Each pipe is produced from a dry mix concrete which is placed in the mould and the inner core is vibrated to ensure solid compaction of the concrete.

The pipe is removed from the core and taken directly to the curing area by crane, where the outer mould is stripped from the pipe. This means there is minimum movement of the pipe in the initial curing phase of the casting process. As a result of the manufacturing process VT Pipes have a thicker wall providing increased cover to steel.

Item Code	Description	Diameter (mm)	Length (m)	Weight (kg)	Unit Price (NZD)

Note:

Not all Items are available at all Sales Centres. Inclusion in the Trade Pricebook does not guarantee availability..

All prices are subject to change.

All prices are ex yard. Freight to site is extra.

Concrete Pipe prices do not include Rubber Rings.

All prices are exclusive of GST.

Sizes are not guaranteed and may vary from stated lengths due to manufacturing processes. Contact your Sales Centre for details.

Weights are not guaranteed and may vary on a regional basis from stated weight. Contact your Sales Centre for details.

Concrete Pipe Jacking

Humes Pipeline Systems has a range of Jacking and Thrusting pipes designed as solutions for trench less pipelines. Humes Titan Jacking and Thrusting pipes are industry benchmark pipes, made to NZS 3107:1978 under tightly controlled ISO 9000 certified quality management systems.

Manhole Riser On Base 1050-1350

Humes manhole risers on base products are made from strong, dense reinforced concrete. Humes manholes are capable of withstanding infiltration and attack from corrosive environments. Flanged bases are factory cast into a manhole riser, projecting 150mm from the outer diameter, providing resistance to floatation. Unflanged bases are cast into the bottom section of the manhole riser, with reinforcement keyed into the riser wall.

Manhole Lids Regional

Humes reinforced concrete flat lids have diameters which conform to the outer diameters of manhole risers. The standard opening of 530mm diameter is eccentrically located approximately 150mm radially from the inside of the manhole wall. Swiflinks are provided. Regional manhole lids are manufactured to meet regional requirements.

Concrete Cesspit & Accessories

Stormwater drainage is an essential task, with the need to convey water from the sides of roads into drains or underground pipelines.

Humes make and supply a variety of products used in the overall stormwater collection process. Just as the requirements for design change from region to region, Humes produces the right product for every specific area in New Zealand.

EnviroPod Catchpit Filters

EnviroPod™ is a catchpit filter insert that removes a significant portion of trash, debris, and other pollutants from urban runoff. This catchpit insert can be installed in either a curb inlet or drop in catch basin. With several mesh screen sizes and effective oil-absorbent media available, it can be customized to meet site-specific requirements. Its unique design bypasses high flows during peak storm events to prevent flooding. EnviroPod is effective as a pretreatment device in a treatment train, and is often the most practical solution for retrofits.

Item Code	Description	Diameter (mm)	Length (m)	Weight (kg)	Unit Price (NZD)

Oil Interceptors

The Humes API Oil Interceptor is a device that separates hydrocarbons from stormwater runoff and has the capability to capture an accidental spill of 2500 litres discharging at 1000 litres per minute. The unit is installed underground and has a compact footprint. The shut-off valve allows containment of excessive accidental spills.

Concrete Power Poles

Humes Civil offers a range of prestressed concrete power poles. These match the characteristics of hardwood poles: lightweight, equal strength in all directions, similar stiffness, a life in excess of 50 years, and robust enough to be handled over rough terrain without damage. The ideal structural solution to these required characteristics is a tapered hollow tube shape. This provides maximum strength with minimum weight and when made out of high strength prestressed concrete results in a pole that is tough, resilient, durable and economical.
