Manhole Riser 1500-2300

Humes manholes are extensively used throughout New Zealand. Made from strong, dense concrete with ratings typically of 60MPa and above, Humes manholes are capable of withstanding infiltration and attack from corrosive environments.

Manhole Accessories

Humes manholes are complemented with a range of accessories in galvanised mild steel: rungs, ladders, safety landings, grills and clamps. In addition, Titanseal is offered to create a permanent, weather tight sealing of concrete surfaces.

Concrete Cesspit & Accessories

Stormwater drainage is an essential task, with the need to convey water from the sides of roads into drains or underground pipelines. Humes make and supply a variety of products used in the overall stormwater collection process. Just as the requirements for design change from region to region, Humes produces the right product for every specific area in New Zealand.

Concrete Box Culverts

Humes Pipeline Systems box culverts are readily available throughout New Zealand. The basic box culvert is available as a full box section. The range of culverts has significantly increased in recent years. They are now readily available up to 4000mm spans and larger.

Concrete Grease Traps

Humes Grease Traps are settling systems designed to trap grease and suspended sediments in industrial liquid waste streams. Generally grease traps consist of a grill and sump. They are used in mechanics workshops, hotels, supermarkets and a wide range of other industrial activities

Concrete Ducting 700/1250

Humes concrete precast ducting is designed to provide covered and open channels for a variety of uses. Holes can be formed in the sides to allow inlet and outlet fittings to be connected. Concrete lids or grates are optional.

Concrete Power Poles

Humes Civil offers a range of prestressed concrete power poles. These match the characteristics of hardwood poles: lightweight, equal strength in all directions, similar stiffness, a life in excess of 50 years, and robust enough to be handled over rough terrain without damage. The ideal structural solution to these required characteristics is a tapered hollow tube shape. This provides maximum strength with minimum weight and when made out of high strength prestressed concrete results in a pole that is tough, resilient, durable and economical.
