

MEADRAIN®

The professionals choice in surface drainage

First Choice for engineered solutions

Polymer concrete channels are becoming increasingly important in civil engineering. Lighter than concrete channels this is characterised by its high strength and light weight properties resulting in outstanding load performance.

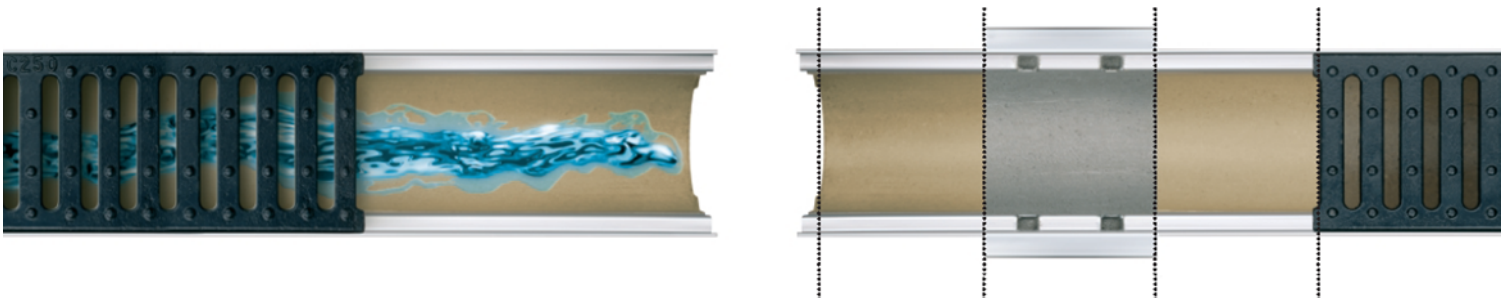

- *Light weight*
- *High Strength*
- *Durable*
- *Chemical Resistant*

Suitable for many load class situations from Class A to G

Humes Pipelines Systems recently added the distributorship of the Mea Polymer Concrete Drainage Systems to their drainage solutions. The globally accepted modular drainage system provides optimum performance in every application. The Mea range and technical information can be viewed on the Humes website: www.humes.co.nz

Mea has been installed successfully in many projects throughout New Zealand in the last ten years and with your continued support it will continue to provide economical solutions to drainage problems.

Technical assistance can be given by Ian Fraser - Mea National Manager
