All prices are subject to change.

All prices are ex yard. Freight to site is extra.

All sizes are nominal. For a more accurate description, please contact your local Sales Centre.

All prices are exclusive of GST.

Irrigation Pods & Pipes

Humes knows irrigation. We understand the vital importance of water management. Working in the stock water and pastoral irrigation markets our mission is to provide a total design, hardware and implementation package – customised to your needs. We distribute a range of Irrigation Systems comprising of Pods, PE Pipes and fittings. Irrigation Pods are a cost effective, easily relocated, hydraulically efficient pasture irrigation system for a farm. Pods are manufactured from high impact UV resistant plastic to allow them to be rugged and durable. Irrigation through pods is flexible enough to suit many different land shapes, sizes and contours.

Troughs

Humes reinforced concrete troughs have been designed to answer many of the problems facing farmers by conventional stock watering systems. Problems such as trough water back siphoning into the stock water system/water tank and stock damaging exposed piped and fittings.

Water Tanks

Humes distributes a range of Plastic and Concrete Water Tanks to suit your water storage requirements. The concrete tanks are made from the same spun concrete process that has been used for many years in the manufacture of concrete pipes. The polyethylene tanks are manufactured using a process of rotational moulding, with the result being products that are durable, structurally solid and strong.

Item Code	Description	Diameter (mm)	Length (m)	Weight (kg)	Unit Price (NZD)
