The Concrete Pipe Association of Australasia presents a brief technical information session on

Developments in Designing, Installing and Testing Pipeline Systems

If you are a specifier, designer or asset manager of pipeline systems in New Zealand, you will not want to miss this Information Session as we update industry with information to improve the understanding and ultimate efficiency and effectiveness of all pipeline systems; specifically Steel Reinforced Concrete Pipe (SRCP).

We will introduce some key topics and provide a forum for Q&A by fielding some of the more senior Technical staff from within the CPAA.

The Concrete Pipe Association of Australasia, representing the manufacturers of concrete pipe in New Zealand, is providing a series of brief Technical Information Sessions throughout the country to highlight to industry recent activity of the CPAA and the technical materials available to designers and asset managers for the design and installation of SRCP.

The presenters provide considerable experience in the industry and a deep knowledge of these developments. They include:

Part of the aim of the forum is to create engagement by enabling delegates to ask questions and discuss industry related matters with CPAA members.

Dates:

20th March, Christchurch

21st March, Queenstown

22nd March, Wellington

23rd March, Tauranga

24th March, Auckland (AM & PM)

Register for Detailed programme
and attendance at www.cpaasn.au

Timing: These are principally Breakfast
meetings 08:00-10:30

PROGRAM :

Introduction to Pipe Class – Design Software for Concrete Pipe

PipeClass is the only steel reinforced concrete pipe design software available to designers in New Zealand. The presentation will provide a brief overview of the program & how to get value from the software for pipe selection & design.

Introduction to the new CPAA Guidance Note Loads on Circular Precast Concrete Manholes and Access Chambers

A new guide to assist specifiers and designers has been developed and is available on NZ members website.

CPAA Training Roll out for Specifiers and for Installers. Installer Training has been rolled out over the past year or so in NZ. We will share with you what we have found in delivering this training and also share our plans for the roll out of Specifier Training. An overview of the latter will be given as well as some key messages for Specifiers.

Field Testing of Concrete Pipe. A Revised document has been prepared to replace the existing CPAA document on post installation testing. We will introduce the new document in this forum.

Q&A session. On topics covered on the day and on other matters.

Presenters:

The presenters provide considerable experience in the industry and a deep knowledge of these developments. They include:

- Dene Cook, Concrete Solutions Technical Manager, Humes
