As a result of these changes, we have developed a NEW septic system specifically for orchards - the Orchard Loo. It’s a better orchard septic solution. It’s a very simple septic system that can be integrated with your current ‘outhouse or dunny’ easily.

1. IT MEETS COUNCIL SEPTIC SYSTEM STANDARDS*. "The vessel is designed to meet Bay of Plenty Regional Council’s requirements for onsite wastewater disposal on kiwifruit orchards. These systems are typically located between the hectare canopies for the workers as they tend to the vines during the day, and not for any dwellings. We have other solutions available for the dwellings if required.

2. IT’S RELIABLE AND ECO-FRIENDLY. (THERE YOU GO, IT LOOKS AFTER ALL YOUR ONES & TWOS) BOP Regional Council has introduced a new standard for kiwifruit orchards which GAP will be inspecting as part of the 2020 audit. All ‘flush to ground’ toilets and long-drop toilets (latrines) must be replaced.

SEPTIC SYSTEMS – IT’S OUR BUSINESS
Oasis Clearwater has been at the forefront of wastewater treatment systems and technology for around 30 years. We are constantly developing and innovating, producing reliable and cost effective systems that have low maintenance requirements, preserve water quality and the environments they operate within.
THE ORCHARD LOO – GET YOURS.
IT’S NOT A BIG JOB. IT TAKES
JUST THREE EASY STEPS.

1. CALL US ON 0800 48 48 49
   You’ll go through to your local Oasis Clearwater septic specialist. Our phone expert team will be able to give
   you advice on the septic system that suits you and your land.

2. GET AN ENGINEER’S REPORT
   If you don’t know who to talk to, we can recommend the right people who will help.

3. GET IT INSTALLED
   You can use one of our preferred installers or use your own. We’ll work with the installers to ensure the supply and install
   is as smooth and simple as possible.

THAT’S ALL IT TAKES!
Once the septic system is installed you’ll receive a PS1 and consent.
